Public Training Subscription

Limitless Learning* for your team

Ensure your team has the necessary skills and knowledge to support your SolarWinds environment—with a Public Training Class Subscription from Loop1.

For an annual subscription of just **\$15,000**—you will receive limitless learning for up to 5 named individuals in your organization.

With **14 distinct classes** to choose from, including our flagship **Orion 101, 201**, and **301** multi-day classes, our Public Training Subscription offers significant value for money versus purchasing individually.

Classes are run in our purpose-built learning lab environment across both US and UK time zones, offering greater coverage for your teams.

[LEARN MORE](#)

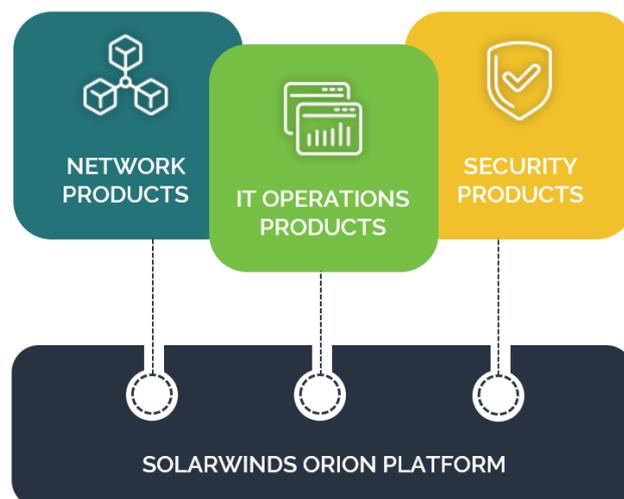

*Training Subscription is valid for a 12-month period and restricted to five (5) named individuals. List price for one seat: 101 class - \$3,000, 201 class - \$2,400, 301 class - \$1,800

Loop1 offers a comprehensive range of global public training classes for IT professionals focused on the SolarWinds portfolio of products—in particular, the Orion Platform.

Classes cover all the core modules, and range from a fundamental level, through intermediate, to advanced. Learn about your SolarWinds Orion product deployment, configuration, and more in a comfortable classroom environment or attend one of our virtual, instructor-led, classes.

Invest in world-class, instructor-led training from Loop1 to improve your marketability as an IT professional and stand out from the crowd.

Benefits of a Loop1 Public Training Subscription

A comprehensive range of classes

We continue to evaluate the range of SolarWinds classes we offer. As a long-standing partner of SolarWinds, with a close working relationship, we continue to evolve and adapt the range of classes we offer in line with the SolarWinds product portfolio.

Published calendar on Loop1.com

We publish our annual [training calendar](#) in advance and strive to ensure classes go ahead as planned. In 2022 we have a total of 56 classes scheduled across NA and EMEA, with additional classes being added as demand dictates.

Superior Value

Send 5 of your team to our 101, 201, and 301 classes individually—you would be looking at a total investment of **\$36,000** versus **\$15,000** with our subscription package—representing a significant saving. Individuals can also re-take the same class if required, during the subscription term.

Dedicated SCP Exam Prep Classes

We currently offer 4 SCP exam prep classes—SAM, NPM, SCM, NTA—support your team's professional development to ensure they have the required skills to manage and maintain your SolarWinds environment.

Top up as required

You can add additional* limitless learning single subscriptions to your package at any time for **\$3,000** per named individual.

Purpose-Built Lab Environment

Our pre-configured training lab environment facilitates hands-on learning, with guided exercises, to help students learn practical skills around installing, configuring, and maintaining SolarWinds products.

*Additional top-up subscriptions will be co-termed to expire on the same anniversary date as your 5-user package—and can only be purchased as an add-on.

2022 Curriculum

Below is a summary of our 2022 public training curriculum—you can view the upcoming [live calendar](#) on our website. More details on each class syllabus can be found by following the 'learn more' links

Orion 101 Introduction

5-day class

Orion 101 provides a comprehensive overview and detailed explanation of the following Orion core modules: NPM, NTA, NCM, SAM, IPAM, VNQM, SCM, UDT, and LA. The class is designed for students of all knowledge levels—it introduces the features and best practices to users who are new to Orion products, as well as diving into advanced configuration options and scenarios for the more advanced user.

[Learn More](#)

Orion 201 Advanced

4-day class

Orion 201 covers how to design and implement end-to-end application monitoring by leveraging SolarWinds products. The class covers NPM, NCM, SAM, DPA, VMAN, SRM, Custom SQL Alerts and Reports. It's designed to help students evolve from basic up/down monitoring to a more holistic end-to-end approach that helps to pinpoint the impact of performance issues or outages across complex application delivery environments.

[Learn More](#)

Orion 301 Automation & SDK

3-day class

Orion 301 is designed for students that have extensive knowledge of the SolarWinds Orion platform, and who want to deep dive into topics such as NPM and the Orion Software Development Kit (SDK). While Orion 101 & 201 are not a prerequisite, students will be more successful with an advanced understanding of SolarWinds Orion. Students will also benefit from a basic understanding of Transact-SQL and PowerShell languages.

[Learn More](#)

NPM Network Performance Monitor

4 (half-day) class

The **NPM** class provides students with the opportunity to discover the network monitoring, alerting, and reporting features of SolarWinds NPM. Gain experience in building Orion Maps and learn best practices for presenting Orion data visually for both business application status, and geographic mapping. Learn how to create and modify properties, groups, dependencies, views, and custom pollers.

[Learn More](#)

NCM Compliance Network Configuration Manager

2 (half-day) class

The **NCM Compliance** class takes a deeper dive into network change management to help students learn more about some of its special features and capabilities. Configuring such topics as compliance, configuration management (manual/auto), and inventory management will be fully covered. The class also reviews configuration of a Cisco Switch in accordance with DISA STIG parameters, enabling students to apply this to other devices and vendors.

[Learn More](#)

SAM Server & Application Monitor

3 (half-day) class

The **SAM** class provides students with the opportunity to learn comprehensive server and application monitoring principles. Gain hands on experience creating new templates, working with SAM component monitors, and developing techniques for determining how to monitor the various layers of business services and applications.

[Learn More](#)

ARM Access Rights Manager

3 (half-day) class

The **ARM** class introduces ARM, covering installation, system configuration and administration of the components that make up the ARM architecture. The class will review important features, share best practices, and provide instruction on some of the more advanced admin configurations.

[Learn More](#)

2022 Curriculum

SEM

Security Event Manager

2 (half-day) class

The **SEM** class guides students through the installation and configuration process of the Virtual Appliance, SEM Console, and Report Console. The class covers working with Agents & Connectors, linking SEM to Active Directory, monitoring real-time activity & filters, working with custom & built-in rules, and using the SEM Reports Viewer.

[Learn More](#)

WHD

Web Help Desk

2 (half-day) class

The **WHD** class provides students with an introduction to the IT Service Management (ITSM) tool and dives a little deeper into many of the complex features. The class will highlight advanced capabilities, share best practices, and cover initial configuration, ticket routing & approval, change advisory board, assets review, parts & billing, reporting options and knowledge base.

[Learn More](#)

SOLAR FLARE

Coder Camp

2 (half-day) class

The **Solar Flare** Coder Camp is not just theory and concepts, it provides practical, hands-on coding experience that will deliver results today. Acquire the fundamental skills you need to build your own operational solutions with actual examples using the SolarWinds REST API, PowerShell, SWQL Studio, and much more.
